

RPE regions

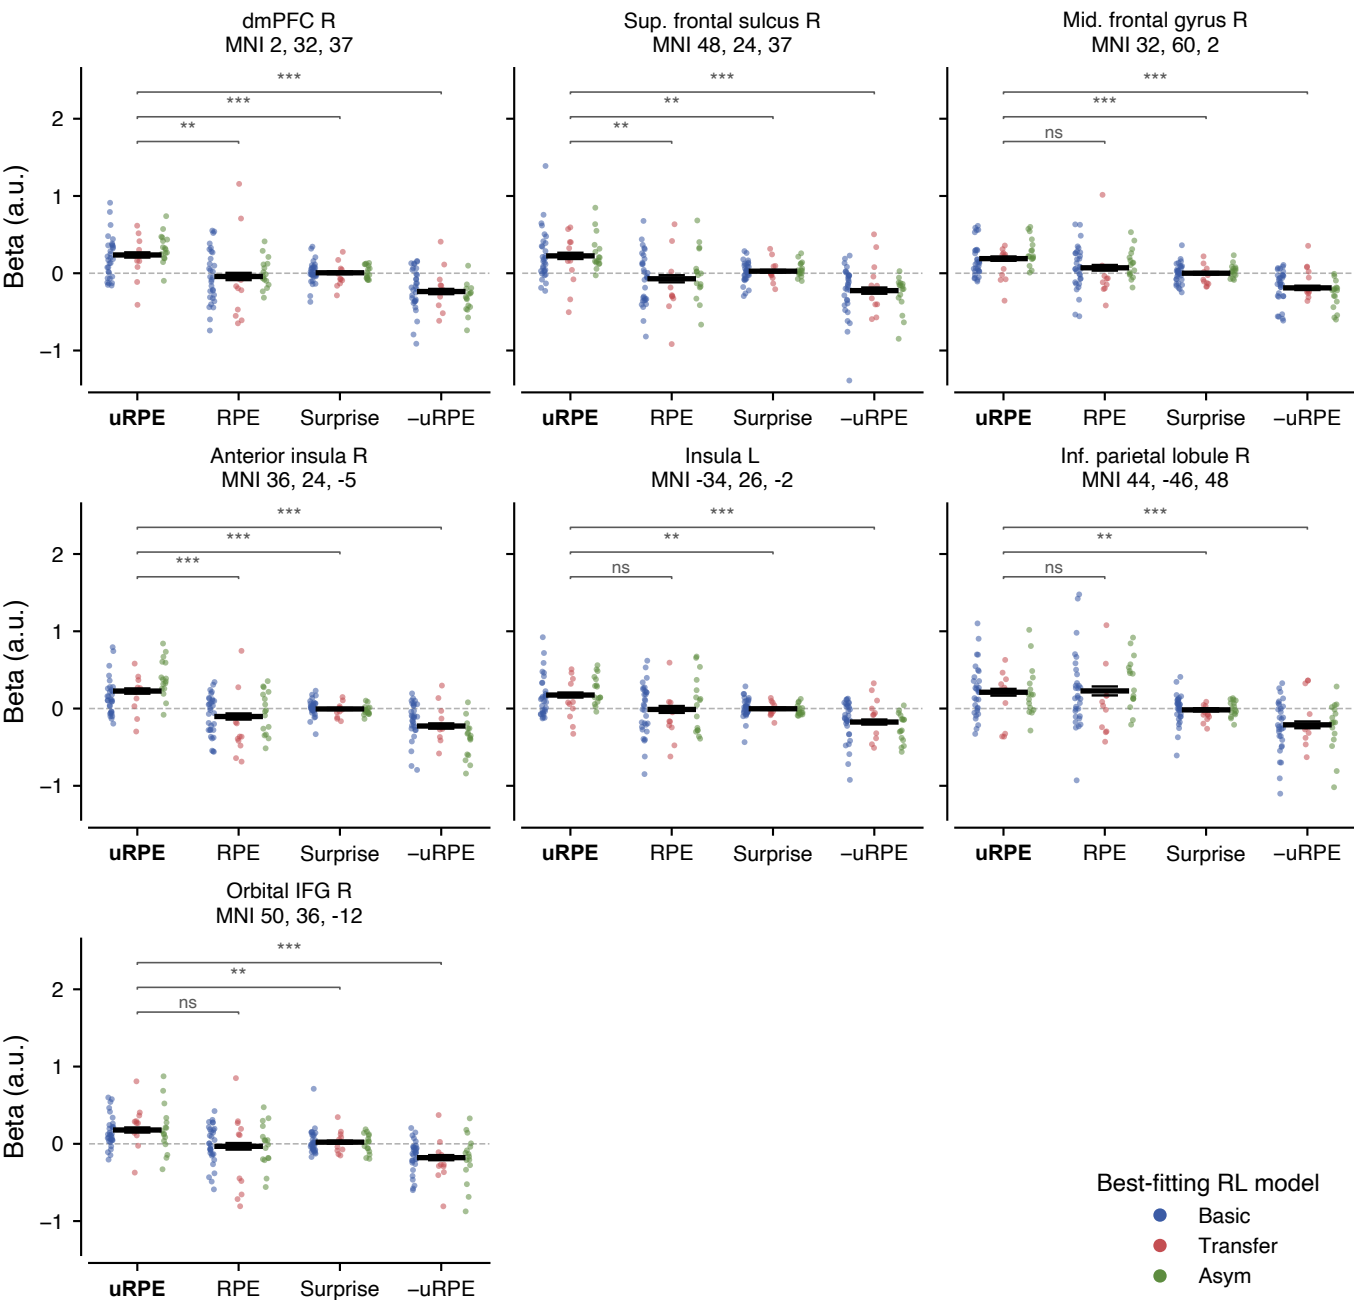

-uRPE: the uRPE betas sign-flipped (outcome expectedness) — same data, not an additional regressor. The uRPE-vs--uRPE bracket is equivalent to testing uRPE against zero.

Surprise regions

-uRPE: the uRPE betas sign-flipped (outcome expectedness) — same data, not an additional regressor. The uRPE-vs--uRPE bracket is equivalent to testing uRPE against zero.

uRPE regions

-uRPE: the uRPE betas sign-flipped (outcome expectedness) — same data, not an additional regressor. The uRPE-vs--uRPE bracket is equivalent to testing uRPE against zero.
