

No cluster-forming threshold · TFCE, two-tailed FWE $p < .05$

model2 · n = 58 · surviving extent, % of mask: RPE +48.7 / -0.0 uRPE +0.0 / -26.6 Surprise +0.0 / -0.0

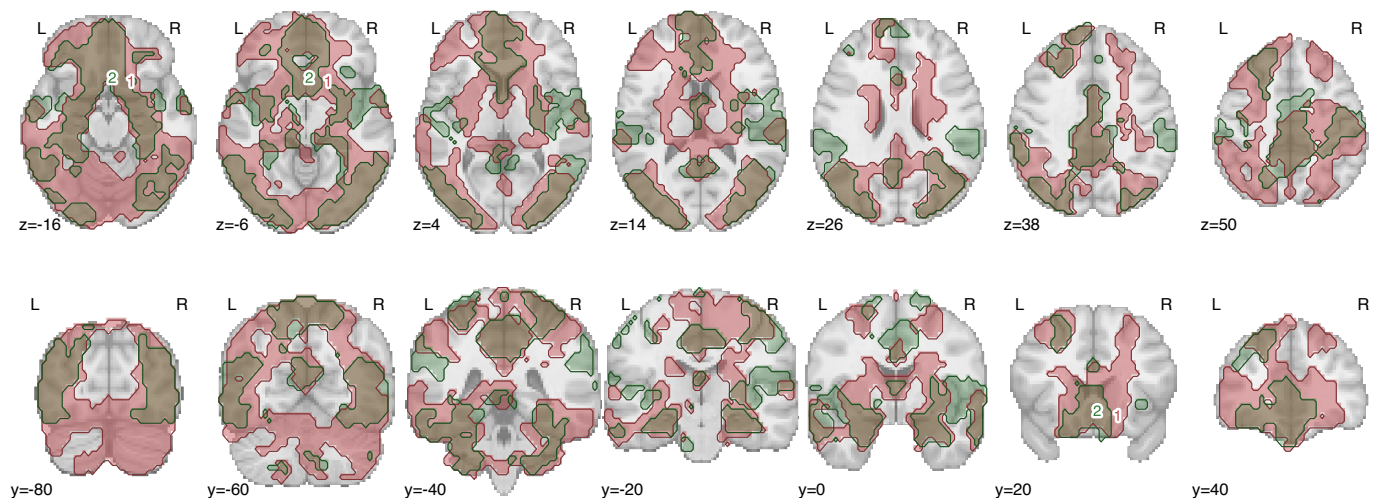

a Positive tails

b Negative tails

c Both tails together

The green of b sits on the red of a — the same territory carries a positive signed-RPE response and a negative unsigned one.
